Creator of decorative acoustic solutions

SlimPanel

Wall Concepts

BENEFITS OF USE

ENVIRONMENT

The compact felt used on the SlimPanel products contains 50% recycled polyester from plastic bottles. After processing, the offcuts are then also reused for another product.

VOC A+ : very low emissions, designed to preserve indoor air quality. Oeko-tex certified compact felt.

PRODUCTS PROPOSED

5 types of products (walls, island, baffle, louvre, totem) available in 24 models of panels, to be used alone or combined

There are different mountings and fittings with many finishes. The SlimColor range is composed of 15 colours.

READY TO INSTALL LIGHTING SOLUTIONS

Dual functionality : the baffles and the islands are transformed into lit acoustic objects specially designed to meet several needs : to light, energise, organise or decorate the space.

Luminous strips or LED backlighting with transformers, long-lasting and with low-energy consumption, are mounted directly on to the panels in the workshop to enable safe and easy installation.

A HIGH-PERFORMANCE TECHNICAL PRODUCT

Equivalent average absorption area from 0.45m² to 3,86m², alpha w from 0,40 to 0,85.

Excellent fire-rating : B s2 d0

LED lighting : backlighting = 4,5W / baffles and islands = 18W and 35W

Fittings : in lacquered steel or polycarbonate to enable use in a damp environment.

Care : clean with a vacuum or damp cloth.

Easy installation : on walls and on ceilings, the fittings used are simple, adjustable and easy to install, allowing installation without having to shut off the space.

A DESIGN CONCEPT

The "Concept" products for walls comprise 4 decorative compositions to suit the wall space available and the acoustic correction required.

A system for backlighting the panels combines function and aesthetics. The transparent polycarbonate fittings for the louvres emphasise the lightweight structure and enhance the shapes and the colours of the slats.

Black or white slings render the hanging cables almost invisible depending on the colour of the ceiling.

SlimPanel,

A range of functional and stylish acoustic solutions,
in eco-friendly compact felt

IMPROVE THE COMFORT IN YOUR SPACES

The SlimPanel acoustic solutions effectively absorb sound waves, helping to reduce the noise level in a space, improving the comfort of the users.

The advantages provided by the absorbent quality of the compact polyester felt are varied, depending on the use of the space : conversing in a restaurant, improve the intelligibility of speakers in a meeting place, creating a quiet and private space to improve concentration in the workplace.

SlimPanel offers a wide range of acoustic solutions adaptable for each project, to suit the layout of the space, the look and acoustic improvement required. Very lightweight and compact, each product in the range is quick and easy to install, on the walls, ceilings or floor.

Ideal products for all public spaces : offices and administrations, restaurants, hotels, reception areas, function rooms, school or sports buildings, businesses.

DECORATE YOUR INTERIORS

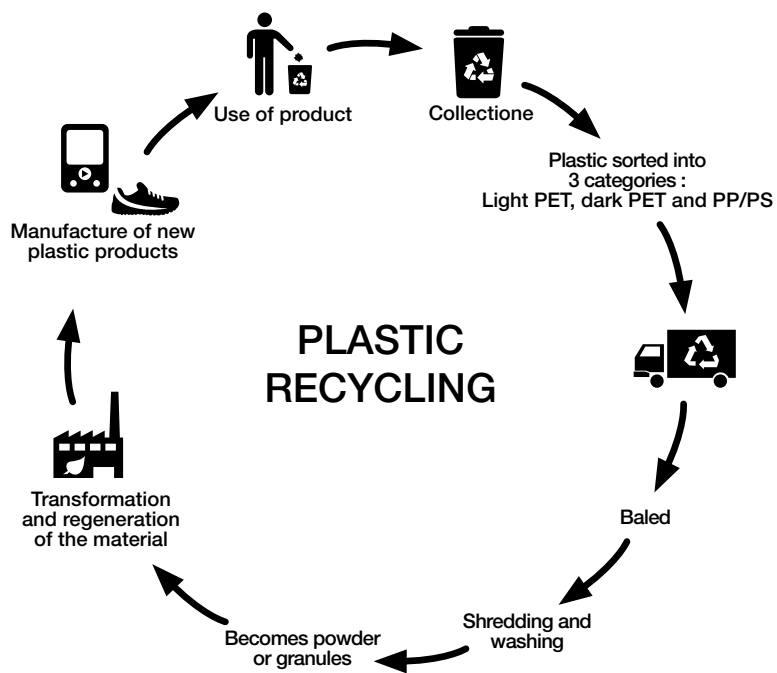

5 types of products available in 24 models of panels. A multitude of possibilities to create unique looks : combine the colours and formats to energise the space or choose a selection of neutral and discrete colours for a timeless, muted ambiance.

The warmth of compact felt, created using blended fibres, and its textile touch, increase the feeling of comfort and well-being.

REDUCE THE ENVIRONMENTAL IMPACT OF THE PROJECTS

The 100% polyester felt, used as the absorbent is an eco-designed material with many advantages :

- Circular economy: contains 50% recycled polyester fibres from plastic bottles.

- The panel made of calendered fibres obtains excellent acoustic results even for low thickness.

- Meets the strictest safety regulations: fire rating B s2 d0

- The SlimPanel acoustic panels are designed and assembled in France

- Long-lasting :

Easy-care and shock resistant. The lifespan of the SlimPanel products means a cost-effective solution for the project manager, with reduced environmental impacts for the community.

SlimPanel

Walls Concepts

SlimPanel Concept, 4 suggestions for acoustic decorative installations for walls : S'(small) M'(Medium) L'(Large) F'(Free). These suggestions give your surroundings character and this functional product has the benefit of being highly decorative. Available on all colours, these Concepts have been designed to meet the dimensional and acoustic constraints of your space.

Each Concept is composed for a maximum of 3 layers of superimposed panels. All separated by a 15mm plenum designed to improve the acoustics and add an optional LED backlighting system to create an impression of volume.

It is a unique solution, creating a unique ambiance.

F'Concept

Personalise your project with a tailor-made SlimPanel Concept : combine the colours at will, select the formats to suit the dimensions of your walls and create your signature wall to match your acoustic requirements. Illuminate it if you wish !

Our team is here to help you throughout the project, all the time adhering to the instructions for superimposing and hanging the panels.

S'Concept

What is the S'Concept

Panels (in mm)	Position on wall
1200 x 600 x 9	1 (wall)
1200 x 400 x 9	2
1200 x 400 x 9	3

Description :
 3 superimposed panels, with a 15mm gap between each one.
 These 3 formats and their positions are mandatory. Any colours from the SlimColor palette. Optional LED backlighting.
 Total wall surface area : 1.18 m² / height : 1200 mm / width : 1600 mm.

SlimPanel

Backlighting

wall / ceiling

SlimPanel is not only an acoustic panel, it is also a decorative illuminated object. Each format has been designed to create an optical halo phenomenon produced by the diffusion of bands of light giving the appearance of volume to the panel or the structure.

Integrated into a wall Concept, a functional SlimPanel becomes a decorative object that defines the space. In an îlot suspended from the ceiling or a wall panel, the backlighting creates a soft and diffused indirect light, bringing warmth to your interior.

Each panel is fitted with a LED strip in the workshop with a heatsink, guaranteeing an optimal lifespan. With neutral white light and a suitable transformer, the light panel suits a large number of spaces.

For the wall panels and also the concepts or the islands, the backlighting system is adapted to each configuration, ensuring easy-use and quick installation. These functional and decorative solutions are delivered ready-to-install.

* Applicable for all colours except 9162 10 63 and 9162 10 51
